Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The applicant's representative contacted the examiner of record with question why the amendment after final, which incorporated objected claim into rejected claim did not put the application in condition for allowance. In a response response the examiner indicated that the rejected claim is in product by process claim and the applicants incorporated limitation of a process, which did not change the status of the rejected claims, since the patentability is given to the product and not to the process by which it is made. In addition the examiner indicated that the novelty of the application lies in the fact that the present invention utilizes mixtures of ester quats. Amending rejected claims to read on mixtures of ester quats would actually render these claims redundant since it would repeat the limitations of claims already indicated as allowable..
